

Section 1: Timmy Nguyen

Profile Overview

- **Name:** Timmy Nguyen
- **Role:** Full-Stack Developer & IT Student
- **Degree:** Bachelor of Information Technology
- **Institution:** Deakin University
- **Location:** Melbourne, Australia
- **Personal Hobbies:** Rhythmic Arcade Gaming (maimai player)

Academic History & Milestones

- **Trimester 1, 2025:** Commenced my Bachelor course.
- **Trimester 2, 2025:** Invited to the Deakin Mathematics Yearbook.
- **Trimester 1, 2026:** Completed Data Structures and Algorithms with a 100 WAM.
- **Trimester 2, 2026:** Joined the IT Student Academy.
- **Trimester 2, 2026:** Focusing on secure frontend application development.

Key Portfolio Projects

1. Tarot Personality Test

- **Type:** Personal UI/UX Project
- **Tech Stack:** SplashScreen Library
- **Repository:** <https://github.com/timmyngn37/Tarot-PersonalityTest>

2. Goodminton

- **Type:** Badminton Booking Service Frontend
- **Tech Stack:** Vue.js
- **Repository:** <https://github.com/timmyngn37/goodminton>

3. Film Streaming Platform

- **Type:** DevOps & Full-Stack Application
- **Tech Stack:** Jenkins, Docker, CI/CD Pipelines
- **Repository:** <https://github.com/timmyngn37/film-streaming-platform>

Section 2: DEV@Deakin (SIT313 Full Stack Development Web Platform)

Project Overview

DEV@Deakin is an interactive full-stack web application developed as the central practical coursework project at Deakin University.

Unit Leadership & Administrative Details

- **Academic Unit:** SIT313 - Full Stack Development: Secure Frontend Applications
- **Unit Chair:** Aaron Spence
- **Learning Environment:** Tasks are submitted via Deakin OnTrack, code repositories are hosted on Deakin's internal GitLab server, and video walkthroughs/demonstrations are uploaded to Panopto.

Key Application Features & Architecture

1. Frontend Architecture:

- Built using React, utilizing components, React Hooks, and React Routes.
- Framework options include Vite or Next.js.
- UI component libraries used include Tailwind CSS, PrimeReact, Shadcn, or Mantine

2. Backend & API Integrations:

- Express.js or Next.js API routes serving as the backend layer.
- Connection between React frontend and Express.js backend using `fetch()`, Axios, TanStack Query, or SWR.
- Handles Cross-Origin Resource Sharing (CORS) and data validation.

3. Authentication & Session Management:

- User Registration and Login authentication backed by Firebase Firestore or standard third-party authentication providers (e.g., Clerk).
- Password security, JWT (JSON Web Tokens) handling, and session management.

4. Features & Pages:

- Home Page & Newsletter: Dynamic listing of featured articles and tutorials with an email newsletter subscription feature linked to Email APIs.
- Post Creation Page: Dynamic form allowing logged-in users to create Questions or Articles using conditional rendering.
- Browse Posts Page: Interactive page to filter, view, hide, and expand community posts based on user access levels.
- Pricing & Subscription Plans: Multi-tier membership system offering Free and Paid user subscription plans with credit card payment modal popups.
- Deployment: Live web application deployment on hosting platforms like Netlify, Vercel, Cloudflare, or Heroku.

Section 3: Deakin University & School of Information Technology

General University Overview

- **Institution:** Deakin University
- **Established:** 1974 (Named after Alfred Deakin).
- **Locations:** Public multi-campus university in Victoria, Australia (Melbourne Burwood, Geelong Waurin Ponds, Geelong Waterfront, Warrnambool, and Cloud Campus).
- **Rankings:** Consistently ranked in the top 1% of universities globally.

School of Information Technology (School of IT)

- **Faculty:** Faculty of Science, Engineering and Built Environment (SEBE).
- **Academic Focus:** Specializes in Full-Stack Web and Software Engineering, Cloud Native Application Development, Cyber Security, Artificial Intelligence, Data Science, and Mobile Development.
